

Year 12 Computer Science Bridging Unit

To help prepare you for Computer Science in Year 12 we would like every student to experience Python Programming.

The link below will take you to a beginner's course which will prepare you for Year 12 even if you have never used Python before. <https://www.educative.io/courses/learn-python-3-from-scratch>

You will need to create an account with Educative, it is free and you can use your school email if you have one.

The evidence for this Unit will be the passing of the End of course Exam. Please screen shot your result and email to phunt@newsteadwood.co.uk with the subject line "Year 12 Bridging Unit 2023-24". The course will offer you a certificate but there is no need to get this as it will cost £9

Mr Hunt

Head of Computer Science
